INTRODUCTION

Research shows Detroit is currently undergoing a significant transformation period. However, many community activists and social scientists consider Detroit’s revitalization to be a mechanism of gentrification that adversely affects the most vulnerable Detroiters. The current poster will provide demographic information, educational statistics, data on social security outcomes, and policy implications for Census Tract 5322, which is located within the 48202 zip code in Detroit.

HEALTH OUTCOMES

- Census Tract 5322 lacks quality schools
- The tract does not have a grocery store.
- There is no major grocery store within a four mile radius of the tract.
- Heart disease is the leading cause of death in this Census tract
- Many residents in the larger vicinity rely heavily on Social Security benefits.
- There are few employment opportunities in the immediate vicinity
- The tract has a park
- The Boston-Edison district provides a safer environment for walking than typically observed in other areas.
